Program Description for the 2021 – 2022 Academic Year:

The University of Florida Oral and Maxillofacial Surgery program located in Gainesville is a six-year residency/M.D. program that accepts two candidates per year. Our program maintains full accreditation by the American Dental Association's Council on Dental Accreditation, and follows the guidelines of the American Association of Oral and Maxillofacial Surgeons. Training involves the full range and scope of the specialty; including dentoalveolar surgery, facial trauma, orthognathic surgery, temporomandibular joint surgery, preprosthetic surgery, dental implants, facial aesthetic surgery, nerve reconstruction surgery and reconstructive surgery, benign and malignant pathology of the head and neck and craniofacial surgery.

The program includes a minimum 30 months of oral and maxillofacial surgery in Gainesville. In addition, there are three years of medical school at the University of Florida and one year of general surgery residency.

All residents are eligible to sit for the American Board of Oral and Maxillofacial Surgery examination after successfully completing the program.

Applicants are not required to take the MCAT or MSKP.

All program applicants must apply through PASS (Postdoctoral Application Support Service), which is a service sponsored by the American Dental Education Association. PASS is an application clearinghouse that provides uniform information to participating programs while relieving applicants of the burden of completing multiple individual applications. Participation in the PASS program is mandatory.

Additionally, our residency program participates in the Postdoctoral Dental Matching Program. This program provides a computerized service that matches preferred applicants to their desired program. Participation in this service is also mandatory by contractual agreement.

The six-year oral and maxillofacial surgery residency/M.D. program is structured as follows:

First Year

Oral and Maxillofacial Surgery
2 months
Second year of Medical School
9 months
Step I Prep 1 month

**USMLE Part I*
